

Vangelis Kourlitis PhD

Data Science | Project Management | ex-CERN

PROFILE

Data scientist with 10 years experience in technical projects and leadership positions at CERN. Specialized in developing scalable pipelines in big data analytics and machine learning domains. Skilled leader with extensive experience mentoring teams, managing R&D projects and authoring and reviewing technical reports. Now seeking to transition into deep tech industry to apply advanced technical expertise and drive the commercialization of innovative technologies.

CONTACT

Location: Thessaloniki, Greece

SKILLS

Project Management

JIRA • Agile

Programming

Python • SQL • Bash • C++ • CUDA

DevOps & Cloud

Git (CI/CD) • Docker • GCP • AWS
(SageMaker)

Distributed Compute

Apache Spark • Dask • Ray

EDUCATION

TECHNICAL UNIVERSITY OF MUNICH

Scientific Project Management
2024 | Munich, DE

UNIVERSITY OF SHEFFIELD

PhD in Physics
2015 - 2019 | Sheffield, UK

ARISTOTLE UNIVERSITY OF THESSALONIKI

B.Sc. in Physics
2009 - 2015 | Thessaloniki, GR

EXPERIENCE

CERN & TECHNICAL UNIVERSITY OF MUNICH | Geneva, CH Analysis Model Group Coordinator

Oct 2023 - Dec 2024

- Led a global 120-member team using Agile to deliver 24/7 support and new features for a ~1 M LOC data analysis platform serving 3,000+ users, ensuring milestones met stakeholder goals through technical reviews.
- Achieved 3x reduction in organizational data storage costs by adoption of a lightweight columnar data format ahead of schedule.
- Rolled out streamlined software configuration paradigm, reducing analysts onboarding time by over 95%.
- Planned and supervised early-career developers projects, delivering innovative software products on time and fostering professional growth.

Data Science Researcher

Mar 2023 - Sept 2023

- Awarded €40k grant to modernize legacy C++ ETL tools for big data stream analysis ($\mathcal{O}(100\text{ TB})$) with scalable array-based solutions, achieving 4x higher throughput and aligning with industry data science standards.

ARGONNE NATIONAL LABORATORY | Chicago, US

Data Science Researcher

Nov 2019 - Feb 2023

- Led a research team of 7 in applying advanced analysis algorithms and deep learning for complex data classification, increasing analysis coverage by 12%.
- Established FAIR principles for AI models and standardized methodologies among international research teams, allowing faster review cycles and enhanced transparency across projects.
- Developed an end-to-end CNN computer vision model, with multi-GPU training strategy in PyTorch and MLflow, to restore fast, low-accuracy sensor images and improve simulation software cost-efficiency by up to 20%.
- Stress-tested Google Cloud Platform's readiness and scalability for big data analysis workflows, minimizing TCO by optimizing egress.

UNIVERSITY OF SHEFFIELD | Sheffield, UK

Doctoral Researcher

Nov 2015 - Oct 2019

- Authored the first technical report at CERN to open source a complete statistical model, setting a precedent for reinterpretation and transparency in the field.
- Developed and maintained C++ data-analysis software across the full development lifecycle, enabling high-throughput distributed computations on a 500k core computing grid.
- Taught Python programming, scientific computing and ML fundamentals to MSc students through hands-on lab sessions.
